The philosophy of Green...

Coffee

"**Green coffee**" beans are **coffee** seeds (beans) of Coffea fruits that have not yet been roasted. The roasting process of **coffee** beans reduces amounts of the chemical chlorogenic acid. Therefore, **Green Coffee** beans have a higher level of chlorogenic acid compared to regular, roasted **coffee** beans. Chlorogenic acid in green coffee is thought to have health benefits.

Experience Good Health Benefits

According to Dr. Simran Saini from Fortis Hospital, "Chlorogenic acid in **green coffee** acts as an antioxidant. It helps in controlling high blood pressure, aids weight loss and maintain blood sugar levels in the body." **Green coffee** has particularly become popular for its weight loss **benefits** just like **green tea**.

2020

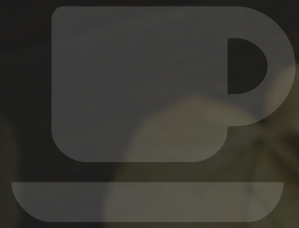

Reduce Weight Naturally

Green coffee became popular for [weight loss](#) after it was mentioned on the Dr. Oz show in 2012. The Dr. Oz show referred to it as "The green coffee bean that burns [fat](#) fast" and claims that no [exercise](#) or diet is needed.

The Best Detoxifier “ Natural - Detoxification”

Green coffee bean extract is a natural **detox**. It cleanses the liver to get it free from toxins, unnecessary fats, and bad cholesterol. With the **detoxification** of the liver, it functions in a better way which increases the metabolism & makes good the entire health.
